SEASONS GREETINGS

THE MISSOURI STATE BOARD OF NURSING
WISHES EVERYONE A MERRY CHRISTMAS
AND A HAPPY AND PROSPEROUS NEW YEAR!

PHILOSOPHY FROM FLO

FLORENCE STILLMAN, R.N., M.S.N.

EXECUTIVE DIRECTOR

Those of you who have been reading this column and those who have had a need to call me will remember that I have continually urged you to communicate with the Board of Nursing when making scope of practice decisions. Many of you have developed that habit, much to the gratification of the Board, and we have become accustomed to making and reacting to those calls in a certain manner. I must focus these comments on that idea.

First, the Board of Nursing as a regulatory agency and I as Executive Director, appreciate very much that you have been so responsive to our requests/suggestions and that you are mindful of legal implications in your practice. Questions relative to legal implications have increased in direct proportion to the shortage of nurses and the pressures exerted on nurses to practice in the manner desired by employers. As long as there is a shortage and as long as nurses are mandated by law to function in most situations under the direction of others then there will be questions about scope of practice.

Second, there has been a law enacted which defines administrative rules and regulations. Simply paraphrased it says that each agency must file as an official rule any statement of general applicability that implements, interprets or prescribes law or policy, or that describes the organization, procedure or practice requirements of any agency. There are several exceptions given in the statute among which is included an interpretation issued with respect to a specific set of facts and intended to apply only to that specific set of facts. Last legislative session another law was enacted which created a potential for penalties for agencies which make statements that should be filed as rules but are not.

In trying to comply with these laws, the Board of Nursing is constrained from answering further scope of practice questions, unless they wish to file a rule. There is such a large number of requests for these decisions, due largely to our efforts in requesting you to correspond with the Board about these matters, that if all were filed as rules we would need one or two full time employees who would do nothing else. We receive 6 - 8 everyday by telephone and from those generate written requests which are placed on the agenda at Board meetings. Filing a rule for every opinion would also have the effect of limiting and restricting the advancement of practice. For example, if the Board determines by rule that it is within the scope of practice for a licensee to perform a particular function and then advancing technology creates different variations of that function, licensees might not be able to legally perform those other variations without the Board first filing a rule. Subsequently, each time technology changes or advances a new rule would need to be filed. The rule making process requires approximately a minimum of six (6) months to complete.

PHILOSOPHY FROM FLO CONTINUED

For the present, it is sufficient to say that the Board will look at all such requests that we receive and will discuss those precise situations at Board meetings in order to make decisions of whether or not to file a rule. It is more than ever imperative that if you request a scope of practice decision, you be present for that discussion. It is probably true that far fewer official opinions will be made and published from those discussions than has been true in the past. There is, however, the idea that the ensuing discussion with the Board will assist in solidifying your thoughts to help you come to an appropriate conclusion.

The Board of Nursing will continue to answer specific nurse/client/practice questions because that law has declared those as being exempt from the rule filing process. If your questions to the Board can be stated in such a manner it will expedite the Board's ability to assist you in a timely way.

The Board of Nursing is working on the solution to this problem since they believe being able to deliver official opinions is beneficial to the profession. We would appreciate your input and support in this matter.

WE NEED YOUR HELP!!!!

In order to update our mailing list, we are asking that you check over the name and address that we have you listed under and inform us of any inaccuracies.

If you are receiving more than one copy of the Newsletter, or if we need to make any changes in your name or address, please let us know.

NOTE: THE ABOVE REQUEST PERTAINS TO THE NEWSLETTER MAILING LIST ONLY

THANK YOU!

NEW APPOINTMENT

The National Council of State Board of Nursing, Inc.'s Board of Directors is pleased to announce the appointment of Dr. Jennifer Bosma as Executive Director.

Dr. Bosma has assumed the position of Acting Executive Director of the National Council since January, 1989. Prior to this appointment, she served as Director of Testing Services from 1985-1988.

Dr. Bosma received her Ph.D. in Education from the University of Chicago. She demonstrates a wide breadth of knowledge regarding testing, test development, regulation and research. She possesses organizational and management skills; she is an excellent planner and brings superb creativity to the development of programs and services. Dr. Bosma is exceptional in her commitment to the National Council as an organization.

The Board of Directors wishes to express its appreciation to the Search Committee, Dr. Charlie Jones-Dickson (Area III), Ann Bissonnette (Area IV), Joyce Showalter (Area II), Phyllis Sheridan (Area I) and Carol Tharp (Area II) for their dedication, diligence and competence in assisting the Board in the search process.

The Search Committee reviewed all eligible applications based on the qualifications listed on the job vacancy announcement. Following this review, selected candidates were interviewed by the Search Committee to assess each candidate with respect to the key accountabilities for the position of executive director as established by the Board of Directors. On October 13, 1989, the Board interviewed the final candidates using a uniform interview format to explore the candidates' capabilities in the dimensions of leadership and management, planning and budgeting, negotiations, interpersonal and communication skills and public policy.

The Board of Directors is pleased to have Dr. Bosma represent their organization as the Executive Director. Please join us in offering our welcome and support to Dr. Bosma as she assumes the responsibilities of this challenging and exciting position. Congratulations!

COMMENTS FROM CAROL CAROL HARTIGAN THARP, R.N., M.A. ASSOCIATE EXECUTIVE DIRECTOR

"There's a nursing shortage out there and the Missouri State Board of Nursing doesn't care."

"Instead of insisting on all of this bureaucratic paperwork, why don't you just try to get more nurses licensed and out there working?"

These are comments which occasionally come our way, more frequently lately, since the demand for nurses is continuing to increase. It is often difficult for nurses to understand some of the requirements of the licensure process, regardless of how detailed and specific the instruction letters are. One of the major confusions that persists is a leftover from the past, when some states has "reciprocity agreements" regarding licensure. One of the things our new staff members always learn is that they are not to use the term "reciprocity" when corresponding with applicants or in giving telephone information. By definition, this word implies an existing agreement between two parties. Webster's gives this specific in its definition of the "R" word: "a recognition by one of two countries or institutions of the validity of licenses or privileges granted by the other."

When a nurse who is licensed in another state applies for licensure in Missouri, s/he is applying for licensure by INTERSTATE ENDORSEMENT. There are no agreements in place which state that if you are licensed in another state it is O.K. to practice in Missouri. A nursing license from another state is not a license to practice nursing in Missouri. Any nurse, licensed in another state, who enters Missouri and begins to practice on that other state's nursing license is placing himself in legal jeopardy. It does not matter if that nurse is "doing hands-on patient care" or not; if that individual is representing himself as a nurse, or is hired in a position which requires a nursing license, he is practicing nursing illegally. We care about that!

When a graduate nurse writes the licensure examination in Illinois, the statute regulating nursing in Illinois does not provide for that graduate to be automatically licensed on successful completion of the examination. When Illinois graduates receive passing exam results, they also receive a mini-application which must be submitted to the Illinois Department of Professional Registration and Education with a fee before they will be licensed. For the period of time from receipt of examination results until they have applied for and been granted licensure, these graduates are not "duly licensed to practice nursing in another state." The Missouri State Board of Nursing cannot issue a temporary permit to a nurse unless that nurse is duly licensed in another state. For the period of time between receiving examination results and submitting evidence of licensure to the Missouri State Board of Nursing so that a temporary permit can be issued, these individuals have no legal basis to practice nursing in Missouri.

COMMENTS FROM CAROL CONTINUED

This situation is unique to Illinois; however, all graduates are required to submit evidence of licensure in another state within thirty (30) days of receipt of their examination results and obtain a Missouri temporary work permit, or they may not legally practice in Missouri. Following the July, 1989 examination, the Board staff had to stop fifty-nine (59) new graduates from continuing to work at the end of the Board established thirty (30) day grace period for obtaining a temporary work permit. By continuing to work, these graduates placed themselves and their employers in legal jeopardy. We care about that!

We are still guilty of wrapping ourselves in the sanctity of the law when it suits our needs, and of chafing under its restrictions when they limit our ability to do what we desire to do. I hate to fill out forms, be transferred from agency to agency, wait in lines, and generally endure all of the accoutrements of a bureaucracy. If I get into trouble, though, I want to have all my bases covered. If an unlicensed nurse would be involved in a malpractice claim while practicing in Missouri, I feel certain that one of the first questions asked during litigation would relate to that nurse's licensure status at the time of the incident. To have to admit that you had been practicing illegally would be tragically damaging to one's creditability. We care about that!

We encourage all nurses, who plan to practice nursing in Missouri, to contact our office before they begin employment to obtain information on how to secure a Missouri temporary work permit. The nurse should also contact our office as soon as s/he receives her/his examination results and find out what s/he needs to do in order to secure a temporary work permit.

In the Law of Professional Licensing and Certification, Randolph P. Reaves, J.D. states:

"The right to practice a recognized profession is not an absolute or unqualified right. It is a right that is certainly subject to the police power of the state. The state's interest, of course, is the protection of the public, consequently, the state controls the various aspects of professional practice. This includes, among other things, admission to practice, standards of practice, continuing competency, and removal from practice."

The Missouri State Board of Nursing takes very seriously their statutory mandate to protect the public. WE CARE ABOUT THAT!

MESSAGE FROM MELINDA MELINDA DOLAN SANDERS, R.N., M.S.N. DISCIPLINE COORDINATOR

The primary purpose of the Missouri State Board of Nursing is to protect the public. To accomplish this, the Board is responsible for ensuring that adequate educational requirements are met in nursing programs throughout the state, assessing minimal competency of graduate nurses, and assuring that practicing nurses are providing optimal patient care.

The chemically impaired nurse's level of competency deteriorates while under the influence of alcohol and/or other drugs, placing his/her patients in jeopardy. Identifying this nurse can be very difficult (see the fall issue of the Newsletter). Many employers feel they can not or do not consider chemical dependency to be a problem until the nurse is actually seen diverting narcotics or self-administering these drugs. However, most colleagues don't realize by the time suspicions are raised and practice issues become a concern, the chemically impaired nurse is generally well into their disease process.

Often when the most obvious symptoms are displayed, the chemically impaired nurse's colleagues are denying this problem exists. The colleagues "enable" the chemically impaired nurse's illness to continue by covering up when they're late or absent, "correcting" a narcotic discrepancy, co-signing for wasted narcotics that were never witnessed, and failing to report the slurred speech, unsteady gait, and charting irregularities that were observed. Colleagues are great at rationalizing the behavior of their chemically impaired friends. It is easy to blame the behaviors on the nurse's physical illnesses, impending divorce, or "burnout". What the colleagues don't understand is that the sooner the chemically impaired nurse can seek help for treatment of this disease, the sooner they can become rehabilitated and possibly avoid some of the life-threatening effects of chemical dependency.

One way to approach a chemically impaired person about their disease is through a structured intervention. Vernon Johnson defines intervention as, "presenting reality in a receivable way to a person who's out of touch with it." In other words, it is a process used to confront the chemically impaired nurse with factual information about behavior(s) which are cause of concern.

The following discussion focuses on the intervention process. In order to conduct a successful intervention, one must have a thorough understanding of the process and all aspects to be considered. While it is my hope this discussion will prove to be helpful, it is not my intention for this to be the sole resource utilized when planning an intervention.

Interventions are indicated when you're suspicious and see symptoms of chemical dependency. By the time there is noticeable deterioration of one's professional practice, there is likely to be significant deterioration in other areas of the impaired nurse's life.

MESSAGE FROM MELINDA CONTINUED

Linda Crosby and LeClair Bissell in their book, To Care Enough, state intervention is "based on the information, observations, and concerns of significant persons regarding the chemically dependent person." The data presented during the intervention is based on specific situations where the impaired nurse's practice appears to have been affected by alcohol and/or other drugs. For example, there is often a precipitating event that causes one or more colleagues to discuss the need to confront the impaired nurse. There is usually also a progression that can be traced in retrospect of the impaired nurse's functioning. Include observations made by other staff members, patient complaints, and specific professional practice problems.

Generally, a successful intervention is one that has been thoroughly planned out in every detail from where to hold the meeting, who will participate, what each person's role will be, the agenda of the meeting, and the goal of the intervention. It is estimated the intervention is ninety (90%) percent completed once the planning is done. Collecting the data necessary for the intervention can include specifics such as reviewing the nurse's notes, medication records, narcotics records, and doctor's orders of patients assigned to the nurse in question. You may also include changes in the relationships of the nurse with the colleagues, physical complaints, family and social changes, and any legal records that may be of concern such as illegal drug possessions, driving while intoxicated, etc.

Selecting the persons to be included in the intervention is the next step. The intervention team usually consists of a coordinator and those persons with the most impact on the nurse as well as the most first-hand information to present regarding changes in the nurse's professional and personal life. There is usually a co-worker or two, a supervisor or representative of nursing administration, and a recovering nurse present. It is not advisable to invite those persons who continue to deny the impaired nurse's problem, are not supportive of the chemically impaired nurse, or don't agree with the goals of the intervention. The intervention team must then rehearse the meeting and also have time to share their own feelings about being part of the team.

One of the most important aspects of planning an intervention is setting the goal and determining the motivating factors that will cause the nurse to seek help. For nurses, the threat of being reported to the Board of Nursing and facing possible discipline on one's license is a strong motivating factor to at least be evaluated for chemical dependency. The most important rule to follow is to insist on compliance with the request of the intervention team and to follow through on the actions threatened if the nurse does not comply.

MESSAGE FROM MELINDA CONTINUED

In general, the goal of every intervention involving chemical dependency is evaluation. The intervention team should find three or four professionals knowledgeable in the field of chemical dependency that will agree to evaluate the nurse. The nurse must agree to be evaluated by one of these professionals, preferably the same day as the intervention. The nurse must also be mandated to follow the recommendations of this evaluation, even if this includes a lengthy in-patient program.

The intervention team must therefore have the answers to the nurse's questions and reasons why this can not be done. The team must have knowledge about the nurse's insurance coverage and the estimated out-of-pocket expenses, make arrangements for child and/or pet care, arrange for transportation to the evaluation, arrange for the needed time off from work for completion of treatment, check on the amount of vacation and/or sick time the nurse has, and any other excuses you feel the nurse may have for not seeking help.

The intervention usually begins by all members of the team being present with chairs in a circle when the nurse arrives. The coordinator of the intervention should ask the nurse to have a seat in the one remaining chair. The coordinator introduces the members of the team and makes a statement of the purpose of the meeting. Specific data is presented in an organized fashion by the members with the first-hand information. One team member will then interpret this information and present the nurse with a recommendation for evaluation. The recovering nurse may then discuss their experience and provide support and understanding to the impaired nurse. The member acting as the authority figure then informs the nurse of the consequences of not agreeing to the evaluation. This may be termination of the job and/or reporting the nurse to the Board for possible disciplinary action.

The intervention team needs to be prepared for the possible reactions of the impaired nurse. The nurse may exhibit defiance, denial, make threats and excuses, attempt to bargain with the team, and make all kinds of promises to change their behavior. The nurse needs to clearly understand what is expected of him/her, where it will be done, under what conditions they may return to work, if and how they will be reported to the Board of Nursing, and what the consequences will be if they don't comply with all these terms.

The intervention process is organized to encourage the chemically impaired nurse to be evaluated. The nurse agrees to be evaluated and follow through with the recommendations of the evaluator. A successful intervention conducted when the suspicion of chemical impairment is first noted lends an earlier treatment and recovery of the impaired nurse. This early step may save the chemically impaired nurse from life-threatening side effects of the disease, including suicide.

MESSAGE FROM MELINDA CONTINUED

In the spring issue of the Newsletter, I plan to discuss the issues involved in nurses seeking treatment for chemical dependency.

If you have any questions about the materials presented here, or about chemically impaired nurses in general, please feel free to contact me at the Board office, 314-751-2334, extension 208. If your group would like a presentation on this subject, please feel free to contact me at the above number.

WEDDING BELLS AND BABY RATTLES AT THE BOARD OF NURSING

Wedding bells rang once again at the Board of Nursing. Connie R. Limbach and Richard L. Clarkston exchanged vows on September 23, 1989 at Our Lady of the Snows Catholic Church in Mary's Home, Missouri. Connie has been employed by the Board since October, 1986 as a Licensure Section Clerk. Congratulations and our best wishes to Mr. and Mrs. Richard Clarkston.

The Board of Nursing is pleased to announce a "new arrival". Kayla Sue Choisser entered this world on Saturday, October 28, 1989 at 4:34 p.m. at St. Mary's Health Center, Jefferson City, Missouri. The proud parents are Alan and Tracy Choisser. Kayla Sue weighed 7 pounds and 13 ounces, was 19 1/4 inches in length and has blonde hair and blue eyes. Tracy is employed at the Board of Nursing as Secretary to the Executive Director. Congratulations, to Alan and Tracy, and welcome to Kayla Sue!

VISIT WITH VADA

VADA E. ARROWOOD, R.N., M.S.Ed.

NURSING EDUCATION COORDINATOR

While reviewing Practical Nurse Minimum Standards with regards to the new P.N. Test Plan, I recall a debate, "Should Success on the State Boards be Considered a Significant Outcome Measure for Educational Programs?" Dr. Carolyn Yocum, Director of Research Services for the National Council of State Boards of Nursing, Inc. and Dr. Carol Anderson, Dean and Professor at Ohio State University, were the participants. I began to reflect on Missouri's criteria for five-year accreditation and the fact that one of the criterion for accreditation is NCLEX performance percentages. No program of nursing, whether it be practical or professional, believes they should limit or design curriculum to provide solely for candidate success on licensure examination. The question is, just how formidable a role should the licensure examination play in measuring the effectiveness or quality of nursing education programs. Dr. Yocum stated that performance on NCLEX is not the single most important measure, but rather one indicator of the program's effectiveness or quality. Other measures include:

1. results of graduate survey with responses directed at the satisfaction of the graduates regarding their perceived preparation to practice,
2. results of employers surveys regarding their satisfaction with graduates' abilities to practice,
3. the number of graduates who are in advanced education,
4. employment rate of new graduates, and finally,
5. performance on NCLEX.

Including NCLEX performance as one of the indicators of a program's effectiveness provides a serendipitous element to detect the possibility of an internal problem when their graduates fail to succeed. It is a "triggering event" which indicates the need to conduct a self-evaluation.

It is true that the NCLEX is practice driven and not curriculum driven. The Test Plan is developed from a job analysis study that solicits information from newly licensed nurses. It identifies the type of activities new nurses are performing and how often they are performing them. It classifies these activities to determine the criticality of the performance and what emphasis to place upon them in the Test Plan.

VISIT WITH VADA CONTINUED

Dr. Carol Anderson disagrees that professional nursing education should have NCLEX performance included as an outcome measure for program effectiveness. She feels that curricula designed to enhance students probability of success on NCLEX could comprise the program and the university's manifesto to broadly educate students in theory and scientific principles. "Professional nursing education encompasses the norm and values of the parent university and designs curricula accordingly". Dr. Anderson does agree that "when the licensure examination reflects contemporary, scientific and state of the art nursing practice, graduates of professional schools of nursing should be prepared to sit for the examination and possess a decent probability of success". However, she adds that most other professions place the responsibility for licensure primarily with the student.

Pondering upon both positions, there appears to be a consensus that graduates should be prepared to pass NCLEX. The divergence in positions seems to occur with the questions, "Should the success rate be considered an outcome measure and used to make decisions regarding a program's effectiveness?" The controversy is not whether graduates should expect to pass their licensure examination, but rather should the success rate be included in accreditation process.

Both practical and professional schools of nursing are quick to point out that they do not constrain curricula, merely meet minimum standards. Nursing programs have always gone beyond the goal of preparing minimally competent graduates. Whether nursing comes to agreement with regards to NCLEX being an outcome measure for accreditation is not the purpose of this article. The purpose is to emphasize that all nursing programs need to be cognizant of the job analysis and the resulting test plan. Can nursing education disregard what practice is expecting nurses to do? Is it ethical to conduct a program of nursing with disregard to the role the newly licensed nurse will be expected to perform? Is it not reasonable to expect nursing education to look to the test plan as an indicator of the state of the art, verify that curriculum is providing for the state of the art and respond when the two are not congruent?

At this time, all but two states have included some reference to success on NCLEX in their regulations of nursing programs. State Boards of Nursing profess their mandate to be protection of the public and successful NCLEX is evidence that newly licensed nurses are minimally prepared to provide safe and effective practice. Aside from this, is it not reasonable that prospective students of nursing should expect that once they have completed their educational program they will be prepared to successfully complete a licensure examination and enter the world of nursing practice? If curricula is in alignment with practice, then curricula would be in alignment with the NCLEX test plan and the expectation of licensure would be a high probability. This is imperative for nursing education. I posit that all nursing education continue to consider this tenet.

PN MINIMUM STANDARDS TASK FORCE

Following a decision made at the October 10-12, 1989 meeting of the board, the Missouri State Board of Nursing established a task force to review and make recommendations for the revision of the practical nursing curriculum mandates identified in the Minimum Standards for nursing education. A group of practical nurse educators from all regions of the state were invited to participate on this task force. Their charge was to compare Minimum Standards mandates with the newly revised practical nursing test plan for licensure and make recommendations for any necessary changes. The basis for revision of the practical nursing test plan grew out of a study of practical nursing duties by the National Council of State Boards of Nursing, Inc., who conducted a job analysis of newly licensed practical nurses.

It now becomes the responsibility of state boards to review curriculum mandates to see how the revised test plan may impact graduate practical nurses who are candidates for the October, 1990 licensure examination. The following persons participated on this task force:

Nurse Educators

Cyndy Harting, RN
Carol Lemons, RN
Sherry Willis, RN
Patricia Francka, RN
Maudie Streetman, RN
Mary Mitchell, RN

BOARD DECISIONS - OCTOBER 10 -12, 1989

PROFESSIONAL AND PRACTICAL SCHOOLS

Kennett AVTS Practical Nursing Program, Kennett, Missouri

Request: Approval of five-year survey report

Decision: Approved with recommendations and/or suggestions

Poplar Bluff Practical Nursing Program, Poplar Bluff, Missouri

Request: Approval of five-year survey report

Decision: Approved with recommendations and/or suggestions

Hannibal AVTS Practical Nursing Program, Hannibal, Missouri

Request: Approval of five-year survey report

Decision: Approved with recommendations and/or suggestions

Kansas City Board of Education Practical Nursing Program, Kansas City, Missouri

Request: Approval of interim survey report on relocation of practical nursing program

Decision: Approved

Park College - Sikeston Campus, Sikeston, Missouri

Request: Approval of interim survey report

Decision: Approved with recommendations and/or suggestions

Mingo Job Corps Center Practical Nursing Program, Puxico, Missouri

Request: Approval of interim school survey report

Decision: Approved report and requested that the materials be returned to Mingo Job Corps Center and they be directed that if they wish to pursue a Practical Nursing Program, they must then submit the required proposal and registration fee.

Platte County AVTS Practical Nursing Program, Platte City, Missouri

Request: Approval of the interim school survey report

Decision: Approve interim school survey report

Lutheran Medical Center School of Nursing, St. Louis, Missouri

Request: Acceptance of their response to the delineation of Microbiology as a discrete course in curriculum

Decision: Accept response as to how microbiology concepts are integrated into nursing courses. It is suggested that if laboratory contact is not included, that it be added

Lutheran Medical Center School of Nursing, St. Louis, Missouri

Request: Approval of their request to utilize St. Louis Regional Medical Center, Hawthorn Children's Psychiatric Hospital and Incarnate Word Hospital as additional clinical facilities.

Decision: Approved

PROFESSIONAL AND PRACTICAL SCHOOLS CONTINUED

Northeast Missouri State University BSN Program, Kirksville, Missouri

Request: Approval of response to their five-year accreditation survey report

Decision: Approved with recommendation and/or suggestions

Missouri Western State College BSN Program, St. Joseph, Missouri

Request: Approval for utilization of Tiffany Square Convalescent Center as an additional clinical facility

Decision: Approved with continued approval contingent upon satisfactory site survey

Jewish Hospital School of Nursing, St. Louis, Missouri

Request: Approval of utilization of Annie Malone Children's Home, Missouri School for the Blind, Litzsinger School and Family Care Center of Carondelet as additional clinical facilities

Decision: Approved contingent upon receipt of a copy of their cooperative agreement contract

Rolla AVTS Practical Nursing Program, Rolla, Missouri

Request: Approval to waive clinical experience requirements for Cindy Spurgeon as a faculty member

Decision: Approved. Board suggests review of her progress as an instructor after one (1) year of service. Program to submit copy of report prepared for Department of Elementary and Secondary Education

Southeast Missouri State University, Cape Girardeau, Missouri

Request: Approval of the appointment of Bobbi Whitnel as faculty member

Decision: Approved

Culver-Stockton College and Blessing-Rieman College of Nursing, Canton, Missouri

Request: Approval to utilize Lewis County Health Department as an additional clinical facility

Decision: Approved

Mexico Public School's Practical Nursing Program, Mexico, Missouri

Request: Approval of one-time request for increased student enrollment by five (5) students

Decision: Approved. Board expects appropriate faculty be employed to maintain an acceptable faculty/student clinical ratio

St. Louis University School of Nursing, St. Louis, Missouri

Request: Approval of their response to their five-year accreditation survey report

Decision: Approved

PROFESSIONAL AND PRACTICAL SCHOOLS CONTINUED

North Central Missouri College ADN Program, Trenton, Missouri

Request: Approval of their response to their five-year accreditation survey report

Decision: Approved conditioned upon evidence of progress toward reduction of hours to be reported annually.

State Fair Community College ADN Program, Sedalia, Missouri

Request: Approval of their response to their five-year accreditation survey report

Decision: Approved

Moberly Area Junior College's Practical Nursing Program, Moberly, Missouri

Request: Approval of their response to their five-year accreditation survey report

Decision: Approved

Cape Girardeau AVTS Practical Nursing Program, Cape Girardeau, Missouri

Request: Approval of their response to the five-year accreditation survey report

Decision: Approved and suggests Vada Arrowood and Patt Alft work out details of a consultation with the Coordinator of the Program

Kirksville AVTS Practical Nursing Program, Kirksville, Missouri

Request: Approval of their response to their five-year accreditation survey report

Decision: Approved

Moberly Area Junior College's ADN Program, Moberly, Missouri

Request: Approval of their response to their five-year accreditation survey report.

Decision: Approved and requests receipt of report of summary of evaluation of clinical rotations in one (1) year

St. Luke's Hospital School of Nursing, Kansas City, Missouri

Request: Approval of their response to their five-year accreditation survey report

Decision: Approved and Board requests clarification of cumulative GPA required to continue in their program

Deaconess College of Nursing Diploma Program, St. Louis, Missouri

Request: Approval of their response to their five-year accreditation survey report

Decision: Approved

PROFESSIONAL AND PRACTICAL SCHOOLS CONTINUED

Penn Valley Community College, Kansas City, Missouri

Request: Approval of their request to utilize Humana Hospital as an additional clinical facility

Decision: Approved

Platte County AVTS Practical Nursing Program, Platte City, Missouri

Request: Approval of their request to utilize Platte City Care Center and Ark of Angels Child Care and Educenter as additional clinical facilities

Decision: Approved with continued approval contingent upon satisfactory surveys

Joplin Practical Nursing Program, Joplin, Missouri

Request: Approval of their request to utilize Joplin Health Care Center as an additional clinical facility.

Decision: Approved

St. John's School of Nursing, Springfield, Missouri

Request: Approval of their request to utilize Kitchen Clinic as an additional clinical facility

Decision: Approved with continued approval contingent upon satisfactory survey

Moberly Area Junior College ADN Program, Moberly, Missouri

Request: Approval of their request to waive faculty education requirements for Kathy Dubbert for this year

Decision: Approved

Moberly Area Junior College ADN Program, Moberly, Missouri

Request: Approval of their request concerning waiving the clinical experience requirement for faculty appointee

Decision: Approved request to waive clinical experience requirement and allow them to hire Mary E. Rollins for this year

Deaconess College of Nursing BSN Program, St. Louis, Missouri

Request: Approval of proposed curriculum changes

Decision: Approved and Board request that course numbers on the curriculum plan be compared to course descriptions for clarification of whether a course has been deleted, renumbered or moved from one level to another

Jewish Hospital School of Nursing, St. Louis, Missouri

Request: Approval of their response to their five-year accreditation survey report

Decision: Approved response except for #5; request clarification on response that information will be deleted, instead of just reviewed

PROFESSIONAL AND PRACTICAL SCHOOLS CONTINUED

Three Rivers Community College ADN Program, Poplar Bluff, Missouri

Request: Approval of their five-year accreditation survey report

Decision: Approved with recommendations and/or suggestions

East Central College ADN Program, Union, Missouri

Request: Approval of request to utilize Metropolitan Medical Center - West and Franklin County Health Service as additional clinical facilities

Decision: Approved

Lutheran Medical Center School of Nursing, St. Louis, Missouri

Request: Approval of five-year accreditation survey report

Decision: Approved with recommendations and/or suggestions

St. Louis Board of Education Practical Nursing Program, St. Louis, Missouri

Request: Approval of five-year accreditation survey report

Decision: Approved with recommendations and/or suggestions

Nichols Career Center Practical Nursing Program, Jefferson City, Missouri

Request: Approval of their five-year accreditation survey report

Decision: Approved with recommendations and/or suggestions

Sikeston Practical Nursing Program, Sikeston, Missouri

Request: Approval of their response to their five-year accreditation survey report

Decision: Approved

St. John's School of Nursing, Springfield, Missouri

Request: Approval for Increased Student Enrollment

Decision: Approved increase of the student enrollment to a total of 420 students for the school (no quotas for individual tracks)

Southwest Missouri State University, West Plains, Missouri

Request: Approval of request for emergency waiver of educational requirements

Decision: Approved, thus allowing them to hire Jane Streff for this semester only. Board expressed their concern that Ms. Streff was hired as faculty prior to receiving Board approval

COMING SOON.....

The staff of the Missouri State Board of Nursing is presently making arrangements for an Educator's Meeting/Seminar to be held on Friday, February 23, 1990. At this time, the plans have not been finalized. So, mark your calendar and watch your mailbox for future information regarding that meeting! Important information can be learned at that meeting about CAT (Computer Adaptive Testing)!!!!

BOARD DECISIONS - OCTOBER 10 - 12, 1989

Interim Survey Visits:

Decision: Board recommends that the Education Coordinator not conduct an on-site interim visit, but that schools will be required to complete a self-study evaluation. Concerns/issue resolutions from the initial visit, identification of problems and implementation and overview of meeting Minimum Standards requirements are the types of information to be addressed in these self-study evaluations

Full Accreditation Survey Visits

Decision: Board recommends to continue conducting on-site visits for full accreditation status

Request for Additional Clinical Facility Forms

Decision: Board recommends that requests for additional clinical facilities which do not contain all information and/or attachments, be returned to the school of nursing for completion. The Board also recommends that the requirement of a rotation schedule be deleted from the request form

BOOKS OF CURRENT RNs AND LPNs

There are books available which list all Registered Professional Nurses and Licensed Practical Nurses currently licensed in the State of Missouri. Anyone wishing a copy of one of these books must send a letter of request to:

Missouri State Board of Nursing
 P.O. Box 656
 Jefferson City, Missouri 65102

The cost will be approximately \$22.50 for Registered Nurses and \$15.00 for Licensed Practical Nurses (cost subject to change). Send no money with letters of request; you will be billed at a later date.

LPN/IV THERAPY COURSE DECISIONS OCTOBER 10 - 12, 1989

St. Luke's Hospital, St. Louis, Missouri

Request: Approval of proposal to initiate an LPN/IV Therapy Course

Decision: Approved

Citizen's Memorial Hospital, Bolivar, Missouri

Request: Approval of proposed changes in their LPN/IV Therapy Course

Decision: Approve the request to add a condition that students must display a 70% score on the mathematics section of the course. The Board also stated, establishing a passing percentage to the pretest indicates they wish to utilize the pretest as a screening device for admission, as well as, a diagnostic tool. The Board does not establish criteria for admissions, only that a diagnostic pretest be administered

Jefferson Memorial Hospital, Crystal City, Missouri

Request: Approval of evaluation of recent changes in their LPN/IV Therapy Course

Decision: Accept evaluation and grant continued approval

Kennett Area Vocational-Technical School, Kennett, Missouri

Request: Approval of proposal to initiate an LPN/IV Therapy Course

Decision: Approved

Home Health Depot, Kansas City, Missouri

Request: Approval of proposal to initiate an LPN/IV Therapy Course

Decision: Approved

Lexington R-V School District, Lexington, Missouri

Request: Approval of proposal to initiate an LPN/IV Therapy Course

Decision: Approved

OCTOBER 10 - 12, 1989 DISCIPLINARY HEARINGS

PN040275: ORDER DATED 11/30/89. REVOKED.

Licensee violated terms of Consent Agreement by not submitting required documentation.

RN098666: DECISION: CONTINUE MISSOURI PROBATION AND BE MONITORED BY THE INDIANA STATE BOARD OF NURSING.

Licensee violated terms of Consent Agreement issued September 22, 1988 by not providing required documentation in a timely manner.

PN037905: ORDER DATED OCTOBER 20, 1989. REVOKED.

While employed as an LPN at a Kansas City, Kansas hospital, licensee signed out morphine but did not chart administration of morphine. Licensee diverted the morphine for personal use. Licensee on other occasions diverted Demerol for unauthorized use. Licensee entered a plea of guilty for theft under \$150.00. Kansas LPN license was revoked for drug misappropriation.

RN056625: ORDER DATED OCTOBER 20, 1989. REVOKED.

In 1987, licensee admitted to the Connecticut Board of Nursing that during 1982, occasionally used Darvon while on duty and diverted to self prescription blanks which were used to obtain Darvon by misrepresentation. Connecticut Board of Nursing placed Connecticut license on probation.

PN009993: ORDER DATED NOVEMBER 8, 1989. REVOKED, REVOCATION STAYED, PROBATION FOR THREE (3) YEARS UNTIL NOVEMBER 8, 1992.

Licensee plead guilty to one (1) count of "conspiracy, punishable upon conviction under Section 558.011 RSMo... with the purpose of promoting and facilitating the offense of neglect of a resident...". The court suspended imposition of sentence and placed licensee on probation for two (2) years.

PN018751: ORDER DATED OCTOBER 20, 1989. REVOKED.

Licensee was terminated from employment as an LPN as a result of unsatisfactory work habits and reporting to work and working under the influence of alcohol.

OTHER DISCIPLINARY ACTION TAKEN BY THE BOARD

RN103755: CONSENT AGREEMENT DATED SEPTEMBER 22, 1989. REVOKED, REVOCATION STAYED, SUSPENSION FOR THREE (3) YEARS UNTIL SEPTEMBER 22, 1992, IMMEDIATELY FOLLOWED BY FIVE (5) YEARS PROBATION UNTIL SEPTEMBER 22, 1997.

Licensee was terminated from a RN position for poor job performance in October, 1987. Licensee was reprimanded in September, 1988 for lack of professionalism, alleged misappropriation of controlled substances, incomplete written orders and orders written in charts of wrong patients. Licensee was terminated in October, 1988 for poor performance. While working as an RN at the home of a terminally ill patient, the licensee self administered Valium, Dilaudid and Versed, which required hospitalization. The licensee was terminated April, 1989 for falsifying information on a job application.

PNO35635: CONSENT AGREEMENT DATED SEPTEMBER 13, 1989. REVOKED.

Licensee pled guilty to a Class C Felony of Abuse of a Child and was sentenced to five (5) years in the Missouri State Department of Corrections and Human Resources.

RN042224: CONSENT AGREEMENT DATED NOVEMBER 20, 1989. REVOKED, REVOCATION STAYED, PROBATION FOR TWO (2) YEARS UNTIL NOVEMBER 20, 1991.

Licensee pled guilty to four (4) counts of obtaining the controlled substance Didrex by altering a prescription and presenting it to a pharmacy.

RN112864: CONSENT AGREEMENT DATED NOVEMBER 8, 1989. PROBATION FOR TWO (2) YEARS UNTIL NOVEMBER 8, 1991.

Licensee misappropriated Morphine and Valium from the supplies of the hospital employer for personal use.

RN089685: CONSENT AGREEMENT DATED NOVEMBER 16, 1989. REVOKED, REVOCATION STAYED, PROBATION FOR TWO (2) YEARS UNTIL NOVEMBER 16, 1991.

While employed as an R.N., the licensee committed ten (10) documentation errors regarding controlled substances.

RN113249: CONSENT AGREEMENT DATED AUGUST 28, 1989. PROBATION FOR THREE (3) YEARS UNTIL AUGUST 28, 1992.

Licensee indicated a history of chemical dependency on the licensure examination application. Licensee gave a history of recreational drug use and a conviction of Driving While Intoxicated.

EMPLOYER ALERT

TASK FORCE UPDATES

The Advanced Practice Task Force met on September 18, 1989 at the Harry S Truman State Office Building. The Task Force continues to study the feasibility of regulating advanced practice. Discussion centers around definitions and specialty nursing groups. The next meeting of the Advanced Practice Task Force is scheduled for 10:30 a.m. on Wednesday, December 13, 1989 in Room 850 of the Harry S Truman State Office Building.

The Professional Minimum Standards Task Force held a working meeting on November 29, 1989 at the Truman State Office Building, Jefferson City, Missouri. The Task Force continues the revisions of the Professional Minimum Standards. Stay tuned to future Newsletters for more information.

**Williams, Gwendolyn: Also known as Gwendolyn Holland-Williams.

NOMINATIONS FOR THE BIAS SENSITIVITY REVIEW PANEL

Over the last two years, the Examination Committee has reviewed research performed by the test service to study a statistical index of potential item bias. As an outgrowth of this research, the National Council will be convening a bias sensitivity review panel in April, 1990.

The Examination Committee will finalize its role and the panel's role in the comprehensive bias review process at its October meeting. In the meantime, the Committee needs your help in recruiting members of the panel.

The Committee seeks nurses from variable ethnic groups with transcultural/multilingual backgrounds. Non-nurses with linguistics or transcultural training are also eligible to serve. The panel will meet four times a year at CTB in Monterey, California, to review each NCLEX examination. We are asking that the panel members make an initial commitment to serve for two years.

Copies of the enclosed criteria may be reproduced and distributed with an appropriate cover letter to potential members. Interested persons should send a copy of their curriculum vitae with a letter describing how they meet the criteria and how they would contribute to the process. THESE SHOULD BE SENT DIRECTLY TO THE NATIONAL COUNCIL BY JANUARY 29, 1990.

If you have any questions about this process, please feel free to contact National Council at 312-787-6555 or the Missouri State Board of Nursing at 314-751-2334.

CRITERIA FOR BIAS SENSITIVITY REVIEW PANEL

Individual Criteria

- (1) Ethnic/cultural background - Members should be assimilated into American culture, but retain ties to their original culture. White, Black, Hispanic, Other Asian, and Asian Indians should be represented on the panel.
- (2) Ability to communicate judgments and opinions and have good interpersonal relations skills.
- (3) Be able to empathize with persons of various socio-economic status and be sensitive to class and lifestyle differences.

General Panel Criteria

- (1) The Panel will consist of seven members.
- (2) The Panel will have a diverse ethnic/cultural background
 - a. Mandatory - Black (1), Hispanic (1), Other Asian (1), Asian Indian (1)
 - b. Strong Preference - Native American (1), White (1).
- (3) Linguistic expertise - at least one generic linguist.
- (4) Multi-language background - the majority of the panel should have this type of background.
- (5) Nursing Expertise - the panel should contain a minimum of two nurses and two non-nurses.
- (6) Panel members must make a commitment for serving a minimum of two years.

AN OPPORTUNITY AS AN NCLEX PANELIST

<p>The Board is seeking well-qualified nurses to contribute to the development of national RN/PN licensing examination.</p> <p>The Board is updating the pool of eligible candidates from which nominees to the National Council of State Boards of nursing may be selected. Qualified nurses from a variety of educational and clinical settings are being sought to apply for nomination as an item writer (IW) or content expert (CE). Qualified applicants are submitted by the Board and are reviewed by National Council and ranked according to the criteria established by the Item Writer Section Committee and/or the Content Expert Committee. Travel, meals and hotel expenses incurred by appointed IW and CE are reimbursed by the test service according to its policies.</p>	<p style="text-align: center;">Qualifications Item Writers</p> <p>A nominee must:</p> <ol style="list-style-type: none"> 1. Be currently licensed in Missouri and have a Master's degree with a major in nursing for the NCLEX-RN. Be currently licensed in Missouri and be either a Licensed Practical Nurse or Registered Professional Nurse for the NCLEX-PN. 2. Be currently employed in clinical nursing practice, or be responsible for teaching students in the clinical area. 3. Have knowledge of the current scope and practice of nursing including entry level practice. 	<ol style="list-style-type: none"> 4. Provide written documentation from at least one immediate supervisor supporting the nominee's expertise in the specified practice area. 5. Be recommended by the Missouri State Board of Nursing. 6. Successfully complete the writing skills test offered by the test service. 7. Be able to be present for an entire week at a place and time designated by the test service.
<p style="text-align: center;">Content Expert Qualifications</p> <ol style="list-style-type: none"> 1. Be currently licensed as a registered nurse in Missouri for the NCLEX-RN examination and be either a Licensed Practical Nurse or Registered Professional Nurse for the NCLEX-PN. 2. Be employed in clinical nursing practice with the majority of time spent in direct patient care. 	<ol style="list-style-type: none"> 3. Be currently responsible for first-line supervision or for working with nurses who have entered nursing practice during the past twelve months. 4. Provide written documentation from one immediate supervisor supporting their expertise in the specified practice area and the nominee's responsibilities for working with/supervising entry-level nurses. 	<ol style="list-style-type: none"> 5. Be recommended by the Missouri Board of Nursing. 6. Be able to be present for an entire week at a place and time designated by the test service.
